

Position: Estimator

Responsibilities:

- Provide Level 1 & 2 cost estimates for upstream and downstream projects and opportunities.
- Review and validate cost estimates prepared by contractors and technical disciplines within the Client organization
- Coordinate costing of complex projects
- Benchmarking for validation and target-setting on major projects
- Perform cost risk analysis
- For each estimate class, determine (from existing Client suite of tools and techniques):
- Appropriate estimating techniques (benchmarking, parametric modelling, detailed estimating, etc.)
- Appropriate estimating tool (client tools, customized estimating spreadsheets, industry estimating software, benchmarking, etc.)
- Appropriate methodology for dealing with uncertainties (standard contingency factors, probabilistic estimating techniques, etc.)
- Participate in updates of in-house estimating tools
- Maintain central feedback and learning on cost estimating from prospects and projects and contribute to updating of "Best Practices" in estimating

Qualifications:

- 5-15 years cost estimating experience from upstream oil and gas projects
- Bachelor's Degree in Engineering, Accounting, Business or Finance
- If no degree – minimum of fifteen (15) years experience in cost estimating
- Computer based estimating software experience, e.g. Icarus, kbase
- Work experience from cost benchmarking would be an advantage
- Must have a "Team attitude", be self-motivated and be willing to support other groups and projects when required
- Demonstrated strong listening and communication skills
- Strategic thinking skills
